Bengaluru, Karnataka, India | +91 7569855386 | leelashankargurram@gmail.com | linkedin.com/in/leela-shankar-gurram

SUMMARY

Electronics and Communication Engineering graduate (**Year of Graduation: 2024**) applying for the **Project Management Apprenticeship** at Google. Currently an iOS Developer at Contus Tech in the media and streaming industry, where I take on project management and project coordination work alongside engineering: running Agile and Scrum ceremonies in JIRA, tracking project scope, timeframes, risks and dependencies, maintaining project documentation, and turning ambiguous requirements into clear plans. Comfortable distilling data into actionable takeaways and data-backed recommendations, supporting stakeholders, and building working relationships with peers, leaders and colleagues. Strong problem-solving and communication skills; work effectively independently and within a team.

EDUCATION

Alliance University, Bengaluru, India

August 2020 - May 2024

Bachelor of Technology, Electronics and Communication Engineering

Year of Graduation: 2024 | CGPA: 3.1 / 4.0

- Coursework: Project Management, Design Thinking, Business Management, Entrepreneurship, Intellectual Property Rights.
- Project Lead, three-semester cross-disciplinary Design Thinking module: coordinated Computer Science, IT and Mechanical Engineering students to deliver a working prototype on schedule.

PROFESSIONAL EXPERIENCE

iOS Developer | Contus Tech Pvt Ltd

September 2024 - Present

Chennai, India (Hybrid) | Media and streaming industry

- Coordinate internal resources and feature delivery across design, backend, QA and iOS teams for six streaming apps live on the App Store across five regions (Europe, US, India, Malaysia, MENA); own project schedules and scope for three major releases, all delivered on time.
- Apply project management day to day: run Agile and Scrum ceremonies, groom the backlog, track risks and dependencies, and maintain project documentation and status reports.
- Redesigned JIRA workflows to automate status handoffs between backend, QA and iOS teams, removing manual bottlenecks and cutting time-to-market by 20%.
- Act as single point of contact for an external engineering partner, coordinating timelines and turning ambiguous client requests into documented requirements, cutting requirement churn by 30%.
- Distill data from product analytics (Google Analytics, Google Tag Manager, AppsFlyer) into actionable takeaways and data-backed recommendations; a release combining a social watchlist, programme-guide improvements and streaming optimisations raised retention by 12% and supported 25% subscriber growth.
- Deliver presentations on feature designs and project progress to clients and leadership, communicating technical detail to non-technical stakeholders; selected by management to lead internal AI-assisted development training and support change management through adoption.

iOS App Development Intern | GSI NEXT Pvt Ltd

July 2024 - August 2024

- Gathered requirements with product managers, wrote user stories, and contributed to sprint planning and backlog prioritisation.

Robotics Engineering Intern | Kodacy

August 2023 - September 2023

- Built a Bluetooth-controlled robotic vehicle for goods transport; troubleshoot real-time sensor communication to meet the deadline.

PROJECT LEADERSHIP

Lead Inventor, Vehicle Safety System | Alliance University

August 2022 - May 2024

Indian Patent Application No. 202441049990 (Published)

- Led a five-person team across three engineering disciplines from concept to published patent; ran weekly syncs, applied risk management to dependencies, and resolved blockers between hardware and software sub-teams.
- Ran a 500+ participant survey to validate the problem, then changed direction to fully automated alerting when the data showed manual reporting was the main point of failure.
- Selected by the university judging panel and recommended to the Intellectual Property Cell; authored the innovation disclosure that secured college-funded patent filing. Published as a conference paper at ICADIE-2024.

SKILLS

Project Management: Project management lifecycle, project planning and scheduling, project scope, project documentation, risk management, change management, dependency tracking, resource coordination, stakeholder management, reporting, Agile, Scrum, sprint planning, backlog grooming, release management.

Tools: Google Workspace (Google Docs, Google Sheets, Gmail, Chrome), JIRA, Basecamp, Git, Bitbucket.

Data and Reporting: Data analysis, data-backed recommendations, performance metrics, Google Analytics, Google Tag Manager, AppsFlyer, Firebase, SQL (basic), Power BI (basic).

Soft Skills: Communication, teamwork, collaboration, problem-solving, critical thinking, adaptability, working with ambiguity, attention to detail, time management, presentations.

Technical: iOS development (Swift, SwiftUI), REST APIs, software development lifecycle (SDLC). **Languages:** English (fluent), Telugu (native), Hindi, Kannada, Tamil.

Certifications: Google Project Management Professional Certificate (In Progress) | Cisco Networking Essentials | Qualcomm AI Upskilling | Generative AI Mastermind, Outskill | One Million Prompter, Dubai Government.
